Website

Task 1.1 explanations:

Description of the page:

This website features a homepage with a navigation bar for easy browsing. It showcases NBA legends like Kobe Bryant, LeBron James, and Michael Jordan, and outlines their stats and images in a table. The poll page showcases a user-friendly form to collect user information, including name, email, age, gender, and agreement to terms. The website is designed with a set colour scheme, centred content, and clear styling.

Description of the html:

The HTML code creates a two-page website. The homepage features a navigation bar with links to "Home" and "Poll" pages. It presents NBA legends' stats in a table with images. The "Poll" page has a form for users to input name, email, password, age, gender, and agreement. CSS styles enhance the look: navbar floats at the top right; headings are centred and large; table is centred with borders; legend images are uniform in size; form elements are aligned and have required fields; and captions are bold. Background is light grey, and the design is user-friendly and visually appealing.
